## Languages

Spanish *Mother tongue*

English *Upper-Intermediate*

## Key skills

Enthusiastic learner

Organisation

Team player

Motivated

Strong communication at all levels

Problem solving

## Interests&hobbies

Open Source

GNU/Linux

Technology

Climbing

Football

Mountain biking

## Summary

I am a UCM graduate in Computer Science and Software Engineering. I have strong skills in developing management and programming. I work with clean and functional code, with proper documentation.

I am enthusiastic about the field, eager to learn the latest programming languages, new technologies and development tools. I work in mobile-based software and am passionate about open source and GNU-Linux systems.

## Education history

2005→2013

### Computer Science and Engineering

Universidad Complutense de Madrid

Full time degree.

## Carrier history

2011→Present

### Assistant scholar in Faculty of Mathematics (UCM)

Department of Algebra. Faculty of Mathematics UCM

Developing Geogebra Applets for the Geogebra Institute of Madrid as part of a project to design resources for maths teachers using JavaScript. I also handle web-site maintenance and development, specializing in Drupal.

2012→2013

### Freelance mobile-based developer

I worked as part of a team of 3 on Android development. Whilst we all worked as developers, I was also in charge of project management. We achieved the following:

- ★ Implementation of an Android app which tracks the cost of calls and automatically calculates a forecast of phone bills.
- ★ Development of an Order Management System for Grupo Delgado using PHP and MySQL, amongst others.

Summer 2012

### Web Developer

Varadero Software Factory

Worked on several projects with PHP, HTML5, MySQL and Java.
